

Jose Emmanuel R. Idpan

Junior Software Developer

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience building and deploying full-stack applications using React, Next.js, Django, Python, and MySQL. Completed a 200+ hour software development internship and led projects involving inventory management, computer vision, and practical AI-assisted development. Seeking an entry-level software engineering role focused on reliable, user-centered applications.

TECHNICAL SKILLS

Languages	:	Java, Python, JavaScript, TypeScript, C++, Dart
Web Development	:	React, Next.js, Django, Node.js, HTML, CSS, Bubble.io
Databases	:	MySQL, PostgreSQL, SQLite
Tools	:	Git, GitHub, Linux CLI, Docker, VS Code, Figma, Vercel, Railway, Bitrix24 CRM, Azure DevOps
AI & Automation	:	AI-assisted development, local LLM tools, n8n, Hermes Agent, OpenClaw
Other	:	Machine Learning, Computer Vision

PROJECTS

Tyche Monorepo — Next.js, React, TypeScript, Tailwind CSS		NOV 2025 - PRESENT
- Built a personal portfolio and project hub to organize software projects, deployed websites, and developer profile. - Developed reusable frontend sections for project showcases, responsive layouts, navigation, and portfolio pages. - Set up a monorepo structure to keep portfolio content and project pages organized in one maintainable codebase. - Links: GitHub Deployment		
Motobai Inventory & Sales System — React, Django, MySQL		JUL 2024 - JUL 2026
- Developed Django APIs for inventory, sales, and authentication workflows, integrating a MySQL database with a React-based management dashboard. - Connected React frontend screens with backend APIs for business management workflows. - Supported testing and debugging of core inventory and sales features. - Led project planning and system architecture while coordinating frontend, backend, and testing responsibilities. - Links: GitHub Video Demo		
Calasense — YOLOv5, Flask, Flutter, Python, Machine Learning		AUG 2025 - JUL 2026
- Led planning and coordination for an undergraduate thesis system focused on calamansi leaf disease classification using YOLOv5. - Trained and evaluated machine learning models for image-based disease detection. - Managed research direction, system flow, documentation, task coordination, and thesis milestones. - Coordinated the mobile app, backend, and model integration work with the development team. - Links: GitHub Video Demo		

PROFESSIONAL EXPERIENCE

Viewings.co.nz — AI Automation & Development Project Contributor		MAY 2026 - JUN 2026
- Built AI-assisted applications and web prototypes based on tasks provided directly by company leadership. - Researched practical uses of AI automation for internal operations, client management, and workflow improvement. - Worked directly with the CEO on assigned projects, translating business ideas into functional prototypes and automation solutions.		
Jairosoft Inc., Davao City — Bubble.io Developer Intern		MAY 2025 - JUN 2025
- Completed 200+ hours of on-the-job training while supporting Bubble.io web application development. - Developed Bubble.io pages, reusable elements, workflows, and database interactions for an eLMS project. - Improved layout, page sections, and basic functionality for the Jairosoft Davao website.		

EDUCATION

Ateneo de Davao University — Bachelor of Science in Computer Science | Graduated 2026
Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Software Engineering, Database Management, Operating Systems, Computer Networks, Information Security

CERTIFICATIONS AND ACTIVITIES

Cisco Certified Network Associate		MAR 2024
DurianPy Member		JAN 2026
NASA Space Apps Challenge Volunteer		OCT 2025
