

# Jose Emmanuel R. Idpan

## Junior Software Developer

### PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience building and deploying full-stack applications using React, Next.js, Django, Python, and MySQL. Completed a 243-hour software development internship and led projects involving inventory management, computer vision, and practical AI-assisted development. Seeking an entry-level software engineering role focused on reliable, user-centered applications.

### TECHNICAL SKILLS

|                 |   |                                                                                             |
|-----------------|---|---------------------------------------------------------------------------------------------|
| Languages       | : | Java, Python, JavaScript, TypeScript, C++, Dart                                             |
| Web Development | : | React, Next.js, Django, Node.js, HTML, CSS, Bubble.io                                       |
| Databases       | : | MySQL, PostgreSQL, SQLite                                                                   |
| Tools           | : | Git, GitHub, Linux CLI, Docker, VS Code, Figma, Vercel, Railway, Bitrix24 CRM, Azure DevOps |
| AI & Automation | : | AI-assisted development, local LLM tools, n8n, Hermes Agent, OpenClaw                       |
| Other           | : | Machine Learning, Computer Vision                                                           |

### PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |                     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|---------------------|
| Tyche Monorepo — Next.js, React, TypeScript, Tailwind CSS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  | NOV 2025 - PRESENT  |
| <ul style="list-style-type: none"><li>Built a personal portfolio and project hub to organize software projects, deployed websites, and developer profile.</li><li>Developed reusable frontend sections for project showcases, responsive layouts, navigation, and portfolio pages.</li><li>Set up a monorepo structure to keep portfolio content and project pages organized in one maintainable codebase.</li><li>Links: <a href="#">GitHub</a>   <a href="#">Deployment</a></li></ul>                                                                                 |  |                     |
| Motobai Inventory & Sales System — React, Django, MySQL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  | JUL 2024 - JUL 2026 |
| <ul style="list-style-type: none"><li>Developed Django APIs for inventory, sales, and authentication workflows, integrating a MySQL database with a React-based management dashboard.</li><li>Connected React frontend screens with backend APIs for business management workflows.</li><li>Supported testing and debugging of core inventory and sales features.</li><li>Led project planning and system architecture while coordinating frontend, backend, and testing responsibilities.</li><li>Links: <a href="#">GitHub</a>   <a href="#">Video Demo</a></li></ul> |  |                     |
| Calasense — YOLOv5, Flask, Flutter, Python, Machine Learning                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  | AUG 2025 - JUL 2026 |
| <ul style="list-style-type: none"><li>Led planning and coordination for an undergraduate thesis system focused on calamansi leaf disease classification using YOLOv5.</li><li>Trained and evaluated machine learning models for image-based disease detection.</li><li>Managed research direction, system flow, documentation, task coordination, and thesis milestones.</li><li>Coordinated the mobile app, backend, and model integration work with the development team.</li><li>Links: <a href="#">GitHub</a></li></ul>                                             |  |                     |

### PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                     |  |                     |
